

Amazon Rainforest

Instructions: **Color** the four layers of the amazon rainforest (forest floor, understory, canopy, and emergent layer). Then **cut** out the **labels** and **glue** them in the correct part.

Empty rectangular box for labeling the emergent layer.

Empty rectangular box for labeling the canopy layer.

Empty rectangular box for labeling the understory layer.

Empty rectangular box for labeling the forest floor.

Understory Layer: small trees and shrubs that require low amounts of light can be found here.

Emergent Layer: the tops of the tallest trees in the rainforest can be found here.

Forest Floor: the home of many of the rainforest's biggest animals.

Canopy Layer: where most of the branches and leaves of most rainforest trees are found.
