

Tally Charts and Bar Graphs

Name _____

Instructions: Take a poll of your classmates' favorite video games. Choose five different video games and label them below. Try to pick video games that you think your classmates might know. Then, record answers in the tally chart. Finally, turn the tally chart into a bar graph on the next page.

Step 1: Poll your classmates and record the data in the talley chart below:

Video Game	Talleys

Step 2: Create a picture of your data using a bar graph. The values you put for your Y-axis depend on your data. If a lot of people chose the same game as a favorite, your Y-axis value will need to be higher than if a lot of people chose different games. You can color the bars on your chart any color you want

Graph Title: _____

Number of People (Y-Axis)									
	Game 1		Game 2		Game 3		Game 4		Game 5
