

**Weather Events Scavenger Hunt Version 1**  
**For use with the Weather Events Interactive Profiles**

Name \_\_\_\_\_

1. The strength of a tornado is measured using the \_\_\_\_\_ Scale. An F0 is the weakest tornado, whereas an \_\_\_\_\_ is the strongest tornado.
2. In one of the worst tornado outbreaks in recorded history, \_\_\_\_\_ tornadoes were reported in 21 states and Canada between May 25 and May 28 2011.
3. \_\_\_\_\_ snow occurs when cold air moves over a large, warm body of water. This kind of snow is particularly common in the \_\_\_\_\_ region of America.
4. A single \_\_\_\_\_ has six sides and can be made up of over \_\_\_\_\_ ice crystals that form around tiny bits of dirt.
5. A single inch of rainfall equals about \_\_\_\_\_ inches of snow.
6. \_\_\_\_\_ occurs when lightning and thunder occur during a snowstorm. In this situation, thunder can only be heard in a radius of a few miles because the snow muffles the sound of the thunder.
7. During the winter of 1971-1972, Paradise, Washington, received \_\_\_\_\_ inches of snow!
8. A severe thunderstorm watch is issued by the \_\_\_\_\_ if conditions are favorable for a severe thunderstorm and a severe thunderstorm \_\_\_\_\_ if a severe storm is approaching.
