

**Weather Events Scavenger Hunt Version 2**  
**For use with the Weather Events Interactive Profiles**

Name \_\_\_\_\_

1. About \_\_\_\_\_ people are struck by lightning.  
\_\_\_\_\_ percent of people actually survive being struck.
2. Thunder is heard after lightning because \_\_\_\_\_ travels faster than \_\_\_\_\_.
3. If you were to see lightning and then hear thunder one second later, how far away was the lightning?
4. In a \_\_\_\_\_ blizzard, the snow is not actually falling, but rather, the wind is blowing snow that has already fallen.
5. A blizzard forms when there is cold air near the ground, when there is moisture or water vapor in the air, and when a layer of \_\_\_\_\_ rises over cold air.
6. Hurricane \_\_\_\_\_ made landfall on August 29, 2005, utterly devastating parts of Louisiana and Mississippi. It became the \_\_\_\_\_ national disaster in American history.
7. Dust storms are actually driven by \_\_\_\_\_, which results from the millions or billions of dust particles bouncing off each other.
8. \_\_\_\_\_ were formed by Dust Bowl era storms that stripped the land of its soil causing great black clouds to darken the skies in the middle of the day.
